The Grissom High School Mathematics Team cordially invites you and your students to participate in the twenty-ninth Annual Grissom Mathematics Tournament to be held at **GRISSOM HIGH SCHOOL** on Saturday, April 22th, 2017.

There will be five levels of competition: Pre-Algebra, Algebra I, Geometry, Algebra II, and Comprehensive. Each school may enter as many students in each level as desired. To compete at the Comprehensive level, students may be currently enrolled in any mathematics course. For all other levels, students must be currently enrolled in or have completed the mathematics course at that level and cannot be enrolled in or have completed a higher level mathematics course.

The individual test consists of 25 multiple-choice questions and 3 tie-breakers. The score will be four times the number of correct answers minus the number of incorrect answers. This year, we will have traditional ciphering with four rounds, one student from each school at each level ciphering in each round. The time limit for each question is 2 minutes. Correct answers submitted in the first 40 seconds will receive 5 points, correct answers submitted in the next 40 seconds will receive 3 points, and correct answers in the last 40 seconds will receive 1 point. The school score for each level will consist of the top four test scores from each school added to the ciphering scores.
